

HYPO-THERM

COMMERCIAL GLASS FROSTER

The CPI (Campus Products, Inc.) Hypo-Therm glass froster will frost a glass in less than 10 seconds. Forgot to stock glasses in your freezer? Not a problem with Hypo-Therm. Instantly save space and energy by not having to keep your glassware in cold storage!

Hypo-Therm is fully portable. Installation is fast and easy. No special tools are required.

Hypo-Therm connects to a liquid CO₂ tank* or cylinder* (not included) and its spout emits a frosty cloud that converts a room temperature glass into an ice-cold frosty glass in mere seconds.

Hypo-Therm's wide spout allows the CO₂ to completely cover a wide range of glasses varying from a regular rocks glass to beer and wine glasses.

Hypo-Therm mounts to a bar or countertop with the included clamp (minimum of 2" overhang required) and takes up very little counter space.

Hypo-Therm's blue LED light casts a glow onto the glass while adding an aesthetic effect to the procedure as it frosts the glass.

Hypo-Therm -- a great addition for your restaurant, bar or banquet hall!!

*with dip tube (not included)
