- UV treated to prevent discoloration
- Dishwasher safe
- Multiple sizes available to fit most doorways

FLEXCOOL

The easiest curtain to pass through in the industry.

FREEZER/COOLER CURTAIN THE PEOPLE FRIENDLY CURTAINSM

Installed FlexCool[®] Curtain

FLEXCOOL ... A NAME YOU CAN TRUST

- **ENERGY SAVINGS**
Reduces airflow between cooler/freezer and warmer outside workspace, which helps to maintain even temperatures.
- **REDUCED EQUIPMENT REPAIRS**
Decreases cooling equipment running time, which reduces repairs and downtime. Controls coil icing, too.
- **97% STRIP OVERLAP**
Lightweight 3" wide strips part easily for passage, then close immediately to maintain an energy efficient seal by tight-fitting 97% overlap.
- **EASY TO REMOVE STRIPS**
Unique Velcro[®]-attached individual strips are easily removed and reattached for easy cleaning or replacement. There is no need to replace the entire curtain and no tools are required.
- **TEXTURED STRIP SURFACE**
Prevents strips from sticking together, which allows the curtain to hang uniformly for maximum effectiveness, thus reducing ice build-up from freezer. Temperature range: -10°F to 160°F.
- **CONVENIENT MOUNTING HEADER**
Header is designed for either wall or ceiling installation on all surfaces.
- **IMMEDIATE DELIVERY**
(24) sizes including 7', 8', and 9' curtain lengths; mounting headers from 36" to 55" wide.
For wider requirements, simply use multiple size combinations.
